WPHH 2012

Cvstos at the heart of Watchland

After the Monaco WPHH at the end of September, Cvstos joined the Franck Muller group in an area of 150m² exclusively dedicated to the brand to exhibit its new innovations at the WPHH in Genthod near Geneva.

Customers and press from around the world were able to visit this new stand, the design and concept of which perfectly reflects the brand's identity, in order to get a preview of the latest model: JetLiner.

As usual, the Cvstos event continued late into the evening and was held at the C-Lounge in the brand's private showroom in Geneva city centre.

A brand new model and a brand new stand for a new stage in the history of the relatively new Geneva watchmaker, which continues to be one step ahead of the times.
